

ILLEGIB

25X1A

With regard to a) and b) it is our recommendation that these two facilities be retained at Whippany for use on DOD contracts. There is nothing classified or sensitive about either of these facilities, and the back scatter apparatus will supplement similar facilities now operating at other frequency bands at the [redacted]

3. Final Royalty Report

The nature of the work involved under this contract was such that no royalties are involved.

4. Final Patent Statement

There are two items in connection with this contract which in our opinion merit patent consideration: 1) The use of a negative impedance converter and 2) The generation of a current sheet. However, since neither appears to have any [redacted] the Laboratories is not interested in filing, but the Government may want to file patent applications on these two items.
